Contract Filter Manufa

National Filters is an industrial filter manufacturer located in Harbor Beach, Michigan. We have been manufacturing high quality American made industrial filters since 1986.

In the beginning, we started manufacturing a small line of hydraulic filter elements to replace the popular Pall & Parker filter lines. Over the years we have expanded our offering to include most popular brands such as Hydac, Purolator, Donaldson, Vickers, Internormen, Eppensteiner, Mahle and many more.

With our experience in industrial filtration, we have worked with our OEM & competitive filter customers to design new filtration products for their applications. We have also reverse engineered many existing parts in order to expand our customers product offerings.

In the late 90's we were asked to take over production of a customer's air filter line, and since then we have branched out into many other filter products aside from hydraulic and air filters.

Do you have discontinued parts that you would like to continue to offer?

Are you looking for cost savings?

Do you have new applications that require quoting?

Are you looking for a new supplier?

Do you want a secondary supplier to existing parts?

Are you having problems with your current supplier?
