

National Filters opened its doors in 1986 as a manufacturer of industrial filtration products. NFI integrates quality and value into every aspect of our filter operations. We create value for our customers by developing and implementing innovative solutions that are financially and technically sound. While our filters provide added value to our customers in terms of productivity, their satisfaction in turn, inspires us to constantly enhance the capabilities of our manufacturing processes. National Filters remains as committed as ever to manufacturing quality OEM replacement filters and providing filter element manufacturing an assembly services while delivering superior customer service.

Past Performance

- Boeing (2019)
- USAF (2019)
- Automation Alley (2018)
- Army Corp of Engineers (2018)
- NUWC (2017)
